Dear **Engineer**,

This month we are introducing our new ACEX4405 carrier card. This COM Express carrier module designed for extreme applications and hosts both Type 2 and Type 3 COM Express modules.

For more information, call our sales engineers at 877-295-7082 to discuss your application or request a quote.

New Rugged COM Express® Module Carrier Card Offers Full-Featured I/O Plus Mini PCIe Expansion Site

Acromag's new ACEX4405 is a rugged, full-featured carrier board for COM Express modules offering a wide assortment of peripheral

I/O connections and a mini PCIe slot for production or prototype systems. ACEX4405 COM Express module carrier board

The new [ACEX4405 carrier card](#) hosts Type 2 or Type 3 COM Express modules in a small footprint of only 95mm x 125mm. Designed for extreme

applications, the ACEX4405 has an extra rigid PCB and extended temperature support. Features include dual ports for Gigabit Ethernet, RS232/422, and USB plus many other features. A mini PCIe slot adds further flexibility for expanded, high-speed I/O capabilities. Locking and latching connectors prevent shock or vibration from loosening cables. The single quantity list price is \$695.
