Industrial Ethernet Analog & Discrete I/O Modules
Experience counts: especially when you are selecting an I/O partner. And with 60+ years of I/O experience, Acromag can help you to improve reliability, increase productivity and reduce your costs.

Acromag: The I/O Leader
Acromag is a customer-driven manufacturer focused on developing embedded I/O products that provide the best long term value in the industry. Compare and you’ll find that Acromag products offer an unmatched balance of price, performance, and features.

60+ Years of I/O Experience
Acromag has more than 60 years of measurement and control experience. Since 1957, we have delivered nearly a million units to thousands of customers around the globe for manufacturing, power, environmental, transportation, and military applications.

Top Quality and a 2-Year Warranty
We take every measure to guarantee you dependable operation and products that perform at or beyond their specifications. Our state-of-the-art manufacturing and military-grade components add an extra degree of ruggedness. Most products qualify for an extended 2-year warranty. And with ISO9000/AS9100 certified quality control, you get full confidence.

Online Ordering
For your convenience, Acromag provides full product documentation and pricing information on our website. You can obtain quotes or even place your order directly on our website.

Fast Delivery from Stock
Most products can be shipped within 24 hours of receiving your order.

Special Services
We are happy to accommodate your special requirements and offer the following services:
- custom product development
- custom calibration
- source inspections, quality audits
- special shipping, documentation
- protective humiseal coating
- plastic and stainless steel tagging

Certification and Approvals
Many Acromag products carry globally recognized agency approvals and safety certifications.
- CE
- UL, cUL
- ATEX
- CSA
- Ethernet conformance
- Modbus conformance
- Profibus certification
- IECex

All trademarks are the property of their respective owners.

**Acromag**
THE LEADER IN INDUSTRIAL I/O

Tel: 248-295-0880  Fax: 248-624-9234  sales@acromag.com  www.acromag.com  30765 S Wixom Rd, Wixom, MI 48393 USA
**BusWorks 900EN Series Ethernet I/O Modules**

The 900EN series is a rugged, high-performance line of networked I/O modules. Modules feature universal input/output ranges and an intelligent microcontroller to provide extreme flexibility and powerful monitoring and control capabilities. Select from a variety of analog and discrete I/O models to meet your application requirements.

Each inch-wide module has a direct network interface, processes I/O signals on up to twelve channels, and handles power conversion. This space-saving approach is very cost-effective for systems that need to add I/O channels at an existing control site or network to new remote sites. By comparison, many “block I/O” devices would require a large, expensive processor block, an I/O rack, individual plug-in I/O terminal blocks, and a special system power supply.

The I/O modules are easily configured using your standard web browser. Each I/O module has embedded web pages to help you set up and control the unit. These web pages guide you through the steps to configure network settings, calibrate the module, and test operation.

Sophisticated watchdog timers increase system reliability. All I/O modules have a watchdog that monitors the microcontroller for failed operations or a “lock-up” condition and automatically resets the unit. If host communication is lost and a configurable watchdog timer expires, all analog and discrete outputs go to a “fail-safe” condition.

**Key Features & Benefits**

- **Web Browser Configuration:** Built-in web page enables configuration with a web browser over an Ethernet connection
- **EtherNet/IP™ or Modbus TCP/IP Protocol:** Supports 10Base-T and 100Base-TX interface
- **Peer-to-peer Ethernet communication:** i2o technology enables module-to-module communication without a controller (Page 14)
- **Direct Network Interface on Each Unit:** Each I/O module has a built-in microcontroller for communication. No bus coupler required.
- **Up to 10 Sockets per Module:** Multiple masters can talk to one module
- **Automatic Data Flow Control:** 10/100Mbps and half/full duplex negotiation
- **Fully Isolated:** I/O, network, and power circuits isolated from each other for safety and noise immunity
- **Wide Ambient Temperature Range:** Provides reliable operation from -40 to 70°C
**Discrete I/O Modules**

These modules monitor discrete levels of various devices and/or provide on/off control capabilities depending on the model selected. Each module has up to twelve channels to save space and minimize costs. Models are available with input- or output-only, or bidirectional I/O configurations.

**Inputs**
- Active-low inputs, 0 to 35V DC

**Outputs**
- Sinking outputs, 0 to 35V DC, up to 500mA

**Functions**
- Monitor discrete state or level
- Control on/off, high/low, open/close switching
- Activate audible or visual alarms
- Count / totalize

**Analog Input Modules**

These units monitor a wide variety of industrial machinery and equipment. They accept direct sensor inputs or DC process control signals from transducers, transmitters, and other instruments.

**Inputs**
- DC current
- DC voltage
- DC millivolts
- RTD/resistance
- Thermocouple
- AC current
- microBlox™ uB module inputs (more than 100 signal types)

**Functions**
- Measure process variables
- Monitor machinery and industrial devices
- Acquire data from non-networked instruments
- Integrate / totalize

**Analog Output Modules**

Analog output modules are ideal for controlling a wide variety of devices. The host defines the output of voltage or current signals to control speed, flow, temperature, frequency, level, force, torque, intensity, and many other physical properties.

**Outputs**
- DC voltage
- DC current

**Functions**
- Write data to local displays or recorders

---

**A Simple Alternative to “Block I/O”**

**Acromag 900EN Series**

- Flexible 15-36V DC power
- Up to 16 I/O channels per module
- Default/Reset Button
- Direct network connection (10/100 Mbps)
- Inch-wide unit
- Easy DIN-rail mounting

**Block or Modular I/O Systems**

5V power supply

**Acromag 900EN Series I/O**

- Stand-alone I/O modules are very easy to use.
  - Configures with standard web browser
  - Direct connection to network
  - Up to 16 channels on one module
  - 1-inch wide for 16 channels
  - Flexible 15-36V DC power requirement
  - Pluggable terminal blocks on top and bottom

**Block or Modular I/O Systems**

- Block I/O systems are harder to implement.
  - Installation of configuration software required
  - Expensive bus coupler required
  - Plug-in I/O modules or terminal blocks required
  - Five inches wide or more for twelve channels
  - Special 5V power supply may be required
  - Fixed wiring terminals on front of unit
## Easy Peer-to-Peer Communication with Acromag i2o®

### i2o input-to-output communication

Acromag’s i2o technology provides the easiest way to link your inputs to your outputs without a PLC, PC or master CPU.

With i2o, many BusWorks 900EN I/O modules have the ability to operate like a long-distance transmitter. You can convert your sensor inputs at Point A to process control signals at Point B. Or, monitor a discrete device at one site by reproducing the discrete level with a relay output at another location.

### Use your existing Ethernet lines to save time and wiring expenses

You can connect the input modules to the output modules using your existing copper/fiber infrastructure or with a single new cable. Multiple I/O modules can be multiplexed through a switch or wireless radios.

### No complicated controllers. No software. No programming.

Acromag’s Ethernet I/O modules have a built-in web page making it simple to configure using your standard web browser. Just click a few menu settings, enter the IP addresses, and you are done. Fast and easy.

### Wire-saving applications

Our i2o technology lets an input module speak directly to an output module. It is ideal for non-critical projects that don’t need a PLC or PC master. Reproduce remote signals based on timed or event updates.

- Remote monitoring of process variables (temperature, pressure, level, flow) and discrete devices
- Remote data display, recording, alarms, or control
- Signal splitters
- Analyzer system monitoring
- Power and water utility monitoring
- Tank level, pump, and valve control
- Remote monitoring of motor loads and contactor status
- Remote control switching stations
- Environmental control systems
- Process shutdown, alarming, and annunciator systems
- RFID systems

### Peer-to-Peer Communication

#### Analog Inputs

- 4-20mA, 0-10V DC, thermocouple, RTD/resistance

#### Discrete Inputs

- on/off, high/low, open/close, momentary push-buttons

#### Any Ethernet Media

- Copper, fiber, wireless, or Internet

#### Analog Outputs

- proportional 4-20mA or 0-10V DC

#### Discrete Outputs

- on/off, high/low, open/close

EtherStax I/O® also supports i2o

Acromag i2o® Technology for Peer-to-Peer Communication

**900EN Series**
Modules with i2o

**Analog Input Modules**
- 961EN / 962EN
  - 6 differential current/voltage inputs
- 965EN
  - 6 thermocouple/mV inputs
- 966EN
  - 6 RTD/resistance inputs
- 967EN / 968EN
  - 8 differential current/voltage inputs

**Analog Output Modules**
- 972EN
  - 4 or 6 current outputs
- 973EN
  - 4 or 6 voltage outputs

**Discrete I/O Modules**
- 982EN
  - 12 solid-state relay outputs
- 983EN
  - 12 solid-state input/outputs

**Combination I/O Modules**
- 951EN
  - 4 analog current inputs, 2 analog current outputs, 6 discrete I/O
- 952EN
  - 4 analog voltage inputs, 2 analog current outputs, 6 discrete I/O

### Installation #1: Copper Ethernet network

**Input Module**
- Existing IT infrastructure
- Up to 16 inputs

**Output Module**
- No controller is required
- Up to 16 outputs

### Installation #2: Fiber optic connection

**Input Modules**

**Switch**

**Output Modules**

**Fiber optic cable**

### Installation #3: Wireless connection (telemetry systems)

**Input Modules**

**Wireless transmission**

**Output Modules**

**Radio**

**Radio**

**NOTE:** Buy modules in pairs. For example: AI with AO DIO with DO or DIO Combo with Combo

**Analog input module configuration screen**

**Discrete I/O module configuration screen**
Easy to Configure

Industrial Ethernet networks offer several advantages. They are proven, fast (up to 100Mbps without fiber optic cable) and ideal for transmitting analog or discrete data. I/O devices are also easy to install and maintain. And with Ethernet networks already in place at many facilities, it is a simple task to bring your process data to any networked computer.

Acromag's 900EN I/O modules are easily installed and configured using any standard web browser. No special software is required because each module has a built-in web page for configuration purposes. The startup process is shown below.

Step 1: Connect the module
Connect the I/O module to your PC with an Ethernet cable. An RJ-45 plug is located right on the front of the I/O module. You can also use an Ethernet switch or switching hub to build a network of Ethernet modules. Acromag offers a 5-port Ethernet switch that includes automatic MDI/MDI-X crossover and accepts straight-through or crossover cable to keep it simple.

Step 2: Configure the module
You may use your own software to issue commands to this module or you may use a web browser to achieve basic functionality. Each I/O module has built-in web pages that allow you to setup and control the module via a standard web browser. Simply type the IP address assigned to your module in the browser's address window to access the module's home page. Here you can jump to several pages in order to set the desired network settings, password protection security, and operational functions. See Figure 2.

Step 3: Test/Control the I/O
After completing the network configuration parameters, you can use the test page to operate your module. The test page will allow you to read inputs, turn outputs on and off, configure the watchdog timer, and set watchdog time-out states. After confirming operation, you are ready to add the I/O module to your control system.
General Operation and Performance Specifications

The following specifications are common to all 900EN Series I/O modules.

**Communication**

- Connector: Shielded RJ-45 sockets, 8-pin, 10BaseT/10BaseTX.

- Wiring: Wired MDI. 90xEN I/O modules do NOT support auto-crossover. 900EN switch supports auto-crossover.

- Protocol: EtherNet/IP or Modbus TCP/IP with web browser configuration. EtherNet/IP supports PCCC object for communication with legacy PLCs (e.g. SLC505).

- IP Address: Default static IP address is 128.1.1.100.

- Port: Ethernet ModbusTCP/IP models (9xxEN-4xxx):
  - Up to 10 ModbusTCP/IP sockets supported.
  - EtherNet/IP models (9xxEN-6xxx):
    - Up to 10 EtherNet/IP sockets and 1 ModbusTCP/IP socket.

- Data Rate: Auto-sensed, 10Mbps or 100Mbps.

- Duplex: Auto-negotiated, full or half-duplex.

- Compliance: IEEE 802.3, 802.3u, 802.3x, Ethernet II.

- Configuration: Web page for configuration and control is built-in with Ethernet access via a standard web browser.

- Communication Distance: Distance between network devices is generally limited to 100 meters using recommended cable. Distances may be extended using hubs and switches.

- Address: IP address is automatically acquired at startup. Unit may be configured to retrieve this address from the network server using BOOTP (Bootstrap Protocol), or via DHCP (Dynamic Configuration Protocol). A static IP address is also user-programmable. A default toggle switch sets the static IP address to the default factory address of 128.1.1.100 for initial configuration.

**Environmental**

- Isolation: I/O channel, power, and network circuits are isolated from each other for common-mode voltages up to 250VAC, or 35VDC off DC power ground, on a continuous basis (will withstand 1500VAC dielectric strength test for one minute without breakdown).

- Complies with test requirements of ANSI/ISA-82.01-1988 for voltage rating specified. (Distances between network devices are generally limited to 100 meters using recommended cable. Distances may be extended using hubs and switches.)

**Electromagnetic Compatibility (EMC)**

- Immunity: per European Norm EN50082-1.

- Emissions: per European Norm EN50081-1.

- Electrostatic Discharge (ESD) Immunity: Per EN61000-4-2.

- Radiated Field Immunity (RFI): Per EN61000-4-3 and ENV50204.

- Electrical Fast Transient Immunity (EFT): Per EN61000-4-4.

- Conducted RF Immunity (CRFI): Per EN61000-4-6.

- Surge Immunity: Per EN61000-4-5.

- Radiated Frequency Emissions: Per EN55022 Class B.
**Ethernet I/O: BusWorks® Series**

**951EN, 952EN** Ethernet Analog and Discrete I/O Modules

4 analog inputs, 2 analog outputs, 6 discrete I/O channels ◆ Ethernet/IP, Modbus TCP/IP, i2o peer-to-peer

**Description**

**Models**
951EN: Combo module, analog current inputs
952EN: Combo module, analog voltage inputs

These modules provide an isolated Ethernet network interface for analog and discrete I/O signals. Multi-range analog inputs and outputs support a wide variety of industrial devices. High-resolution, low noise, A/D and D/A converters deliver high accuracy and reliability. 3-way isolation further improves system performance. The discrete I/O provide monitoring and control of on/off, high/low, or open/close industrial devices. Tandem I/O provides output level control and status verification in one unit.

The i2o function lets inputs on one module write directly to outputs on another module.

**Analog Input Ranges**
- DC Current (user-selectable ranges)
  - 0 to 1mA, 0 to 11mA, 0 to 20mA, 4 to 20mA
  - 0 to 20 amps AC (with optional AC sensor)
- DC Voltage (user-selectable ranges)
  - ±1V, ±5V, ±10V DC

**Analog Output Ranges**
- DC Current (user-selectable ranges)
  - 0 to 1mA, 0 to 20mA, or 4 to 20mA
    - (0 to 625 ohm loads, typical)
- Discrete I/O Range
  - 0 to 35V DC active-high inputs
  - Current sourcing (high-side switched) outputs

**Network Communication**
- EtherNet/IP or Modbus TCP/IP 10/100 network

**Power Requirement**
- 15 to 36V DC supply (3.3 Watts) required

**Approvals**
- CE/ATEX marked.
- UL, cUL listed, Class I, Div. 2; Groups A, B, C, D.
- EtherNet/IP, Modbus/TCP conformance tested.

**Key Features & Benefits**
- Configurable from standard web browser
- EtherNet/IP or Modbus TCP/IP communication with automatic 10/100Mbps negotiation
- i2o technology for peer-to-peer communication without a network controller (see Page 6)
- Multi-function, multi-channel stand-alone module is very economical
- High-resolution 16-bit Σ-∆ A/D and D/A converters ensure precise measurements
- 0-35V DC solid-state logic interface can monitor or control a wide variety of devices
- Discrete I/O channels are individually configurable as inputs or outputs in any combination
- Bi-directional discrete I/O facilitates read-back monitoring of the output state
- Built-in 5.6K ohm pull-down SIP resistors (socketed)
- Selectable failsafe modes (0%, off, last-state, or pre-defined) help prevent unsafe conditions
- Compact packaging with pluggable terminals saves space and simplifies wiring
- Wide operational temperature range permits installation in extreme environments

**Performance Specifications**

◆ **General Specifications**
See Page 9 for communication and other specs.

◆ **Analog Input**
  **Configuration**
  Four input channels. Input range is selectable as a 4-channel group.
  **Accuracy**
  Better than ±0.05% of span (0.1% for 0-1mA range), typical. Accuracy near or below 0mA or 0V is degraded if input COM shares AO/DIO RTNs.
  **Analog to Digital Converter (A/D)**
  16-bit Σ-Δ converter.
  **Resolution**:
  0.005% or 1 part in 20000.
  **Noise Rejection**
  Normal Mode: Better than 40dB @ 60Hz.
  Common Mode: Better than 140dB @ 60Hz.
  **Input Impedance**
  DC current input (951EN): 49.9 ohms.
  DC voltage input (952EN): Greater than 110.5K ohms.

◆ **Analog Output**
  **Configuration**
  Two output channels. Individually selectable ranges.
  **Accuracy**
  Better than ±0.05% of span (0.1% for 0-1mA range), typical.
  **Digital to Analog Converter (D/A)**
  16-bit converter.
  **Output Voltage and ON Resistance**
  Up to 35V DC max. (0 to 330mA/ch continuous).
  0.15 ohms maximum ON resistance.

◆ **Environmental**
  **Ambient Temperature and Humidity**
  Operating: -25 to 70°C (-13 to 158°F).
  Storage: -40 to 85°C (-40 to 185°F).
  **Relative Humidity**:
  5 to 95%, non-condensing.
  **Isolation**
  1500V AC for 60 seconds or 250V AC continuous.
  3-way isolation between I/O, network, and power.

◆ **Discrete Input**
  **Input Type**
  Six independent, active-high, buffered inputs with a common connection. Built-in 5.6k ohm pull-down resistors socketed for 3-channel groups.
  **Input Signal Voltage Range**
  0 to 35V DC, maximum.
  **Input Impedance**
  100K ohms, typical.
  **Input Signal Threshold**
  TTL compatible with 100mV of hysteresis, typical.

◆ **Discrete Output**
  **Output Type**
  Six independent, open-source, MOSFET switches.
  **Output Voltage and ON Resistance**
  Up to 35V DC max. (0 to 330mA/ch continuous).
  0.15 ohms maximum ON resistance.

## 958EN Ethernet microBlox™ Interface Modules (Analog Input)

![Image of 958EN module with microBlox](image)

16-channel single-ended voltage input  ◆ DB25 port for microBlo® modules  ◆ Modbus TCP/IP comm.

### Description

**Models**
- 958EN-4016: Industrial-grade units
- 958EN-4C16: Commercial-grade units

These modules interface high-level analog input signals to an Ethernet control network. A high-performance design ensures reliable measurements and dependable operation.

The DB25 port provides a parallel connection to a rack of microBlox™ analog input modules. The microBlox™ modules provide an isolated front-end with signal conditioning of up to 16 sensor signals.

Industrial-grade models add a configurable integrator/totalizer plus superior accuracy and temperature performance compared to the economical commercial-grade version.

**Input Ranges**
- ±5V DC via DB25 port connection (default) or ±10V DC

**Ethernet Communication**
- Modbus TCP/IP, 10/100Base-T(X)

**Power Requirement**
- 18 to 36V DC, 2.0W

**Approvals**
- CE, UL/cUL (industrial-grade units only)
- Zone 2, Class 1, Division 2, ABCD

### Key Features & Benefits

- DB25 port provides an easy connection to a rack of microBlox™ signal conditioning modules (4, 8, or 16 ch panels supported)
- High-resolution 16-bit A/D
- Fast scanning of all channels in 8mS
- 3-way isolation and surge suppression
- Configurable integration/totalization function with non-volatile memory
- Dual-format 16/32-bit data registers
- Scaling registers on all channels
- Configurable sample averaging
- Automatic calibration and self-test
- User-adjustable TCP Ports 1-99,999 for advanced network configuration
- Web browser configuration with copy utility for fast setup

### Performance Specifications

**Accuracy**
- 958EN-4016: Less than 0.05% of range
- 958EN-4C16: Less than 0.10% of range

**Input Impedance**
- 4M ohms

**Operating Temperature and Humidity Ranges**
- 958EN-4016: -40 to 70°C (-40 to 158°F)
- 958EN-4C16: 0 to 55°C (32 to 131°F)
- Relative humidity: 5 to 95%, non-condensing

**Isolation**
- 3-way isolation of I/O, power, network circuits
- Peak: 1500V AC, ANSI/ISA-82.01-1988
- Continuous: 250V AC, 354V DC

### Ordering Information

**I/O Modules**
- 958EN-4016 (industrial-grade)
  16-ch voltage input module with integrator
- 958EN-4C16 (commercial-grade*)
  16-ch voltage input module
  * CE approval only, no integrator function

**Accessories**
- Industrial Ethernet Switches

**MicroBlox™ Signal Conditioning Modules**

**Description**
Acromag's microBlox™ uB Series I/O modules offer a compact, high-performance solution for interfacing sensors and field devices with data acquisition systems. uB signal conditioning modules are ideal to isolate, filter, convert and amplify a wide variety of signal types for test, measurement and control systems. Just plug uB modules into 4, 8, or 16-channel backpanels in any mix for a high-density analog I/O interface. Channel-to-channel isolation provides optimal noise and surge protection from ground loops, spikes, and high common mode voltages.

**Key Features & Benefits**
- Selection of 175 I/O modules with either a fixed-range or Bluetooth® wireless configuration option, as well as cost-saving commercial grade versions
- User-configurable I/O ranges with smartphone or tablet
- Input polling with trend charts in Android® or iOS® app
- Alarm output function with setpoint and deadband
- 1500Vac isolation field-to-host and channel-to-channel
- Up to 0.05% accuracy and 130db CMR
- Shock and vibration-resistant without screws

**Applications**
- Systems requiring high channel-to-channel isolation, noise rejection, surge suppression, and amplification
- Designed for front-end signal conditioning or embedded applications:
  - DCS, PLC, controllers, data acquisition, remote I/O, recorders, etc.
- On-board embedded OEM applications
- Protects equipment, increases accuracy, and installs/expands easily
- Low-cost, high-density amplifier system

**Ordering Information**

**Input Modules**
- mV Volt Field Input; 5Hz or 1kHz
- DC Voltage Input; 4Hz or 1kHz
- Narrow Band DC Current Field Input
- Platinum RTD Field Input; 2/3- or 4-wire
- Thermocouple Field Input; linearized or non-linearized
- 2-Wire Transmitter Field Input with Loop Excitation
- Frequency Input with Excitation Supply

**Accessories**
- 4-, 8-, and 16-position analog I/O backpanels
- Power supplies

**Applications**
- Systems requiring high channel-to-channel isolation, noise rejection, surge suppression, and amplification
- Designed for front-end signal conditioning or embedded applications:
  - DCS, PLC, controllers, data acquisition, remote I/O, recorders, etc.
- On-board embedded OEM applications
- Protects equipment, increases accuracy, and installs/expands easily
- Low-cost, high-density amplifier system

**Ordering Information**

**Input Modules**
- mV Volt Field Input; 5Hz or 1kHz
- DC Voltage Input; 4Hz or 1kHz
- Narrow Band DC Current Field Input
- Platinum RTD Field Input; 2/3- or 4-wire
- Thermocouple Field Input; linearized or non-linearized
- 2-Wire Transmitter Field Input with Loop Excitation
- Frequency Input with Excitation Supply

**Accessories**
- 4-, 8-, and 16-position analog I/O backpanels
- Power supplies
Ethernet I/O: BusWorks® Series

961EN, 962EN Ethernet Analog Input Modules

6-channel differential analog current or voltage input ◆ Ethernet/IP, Modbus TCP/IP, i20 peer-to-peer

Description
Models
961EN: 6 DC current input channels
962EN: 6 DC voltage input channels

These modules provide an isolated Ethernet network interface for six analog input channels. Differential inputs eliminate ground loops and thus the need for isolators in many applications. Multi-range inputs accept signals from a variety of sensors and devices. High-resolution, low noise, A/D converters deliver high accuracy and reliability.

Input Ranges
Ranges are selectable for a 3-channel group.
DC Current:
0 to 1mA, 0 to 11mA, 0 to 20mA, 4 to 20mA
0 to 20 amps AC (with optional AC sensor)
DC Voltage:
±78mV to ±10V DC (eight range options)

Network Communication
EtherNet/IP or Modbus TCP/IP 10/100Mbps

Power Requirement
15 to 36V DC supply (2 Watts) required

Approvals
CE/ATEX marked.
UL, cUL listed, Class I, Div. 2; Groups A, B, C, D.
EtherNet/IP, Modbus/TCP conformance tested.

Key Features & Benefits
◆ Configurable from standard web browser
◆ EtherNet/IP or Modbus TCP/IP communication with auto 10/100Mbps data rate negotiation
◆ i2o technology for peer-to-peer communication without a network controller (see Page 6)
◆ 6-input stand-alone module is very economical
◆ Differential inputs eliminate ground loops
◆ High-resolution 16-bit Σ-∆ A/D converters ensure precise, high accuracy measurements
◆ Wide operational temperature range permits installation in extreme environments

Performance Specifications
◆ Input
  Accuracy
  Better than ±0.05% of span for nominal input ranges.
  Analog to Digital Converter (A/D)
  16-bit Σ-∆ converter. 0.005% (1/20000) resolution.
  Noise Rejection
  Normal Mode: Better than 40dB @ 60Hz. Common Mode: Better than 140dB @ 60Hz.
  Input Filter Bandwidth
  -3dB at 3Hz, typical.
  Input Conversion Rate
  80mS per channel.
  Input Impedance
  DC current input: 25 ohms.
  DC voltage input: Greater than 110.5K ohms.

◆ Environmental
  Ambient Temperature and Humidity
  Operating: -25 to 70°C (-13 to 158°F).
  Storage: -40 to 85°C (-40 to 185°F).
  Relative Humidity: 5 to 95%, non-condensing.
  Isolation
  1500V AC for 60 seconds or 250V AC continuous.
  3-way isolation between I/O, network, and power.

Ordering Information
NOTE: i2o function only on Modbus TCP/IP modules
◆ I/O Modules

Description

Models
963EN: 12 DC current input channels
964EN: 12 DC voltage input channels

These modules provide an isolated Ethernet network interface for twelve analog input channels. Compact design saves space and lowers system costs. Multi-range inputs accept signals from a variety of sensors and devices. High-resolution, low noise, A/D converters deliver high accuracy and reliability.

Input Ranges
Ranges user-selectable on each terminal block for a group of four input channels (4-channel basis).

- DC Current:
  - 0 to 1mA, 0 to 11mA, 0 to 20mA, 4 to 20mA
  - 0 to 20 amps AC (with optional AC sensor)

- DC Voltage:
  - ±1V, ±5V, or ±10V DC

Network Communication
EtherNet/IP or Modbus TCP/IP 10/100Mbps

Power Requirement
15 to 36V DC supply (2 Watts) required

Approvals
CE/ATEX marked.
UL, cUL listed, Class I, Div. 2; Groups A, B, C, D.
EtherNet/IP, Modbus/TCP conformance tested.

Key Features & Benefits

- Configurable from standard web browser
- EtherNet/IP or Modbus TCP/IP communication with auto 10/100Mbps data rate negotiation
- 12-input module has very low cost per channel
- Universal DC inputs support a wide variety of industrial sensors and signals
- High-resolution 16-bit Σ-Δ A/D converters ensure precise, high accuracy measurements
- Wide operational temperature range permits installation in extreme environments

Environmental

- Ambient Temperature and Humidity
  Operating: -25 to 70°C (-13 to 158°F).
  Storage: -40 to 85°C (-40 to 185°F).
- Relative Humidity: 5 to 95%, non-condensing.
- Isolation
  1500V AC for 60 seconds or 250V AC continuous.
  3-way isolation between I/O, network, and power. Inputs share a common.

4 or 6-channel thermocouple/millivolt input ◆ Ethernet/IP, Modbus TCP/IP, i2o peer-to-peer messaging

Description
These modules provide an isolated Ethernet network interface for up to six input channels. Differential inputs eliminate ground noise and each terminal block includes a cold junction compensation (CJC) sensor for more precise temperature measurements. Multi-range inputs accept signals from a variety of sensors and devices. High-resolution, low noise, A/D converters deliver high accuracy and reliability.

Input Ranges
Ranges are selectable for a 3-channel group.
Termocouple (user-selectable type)
Type J, K, T, R, S, E, B, or N
DC Millivolts (user-selectable range)
±100mV or ±1V DC

Network Communication
EtherNet/IP or Modbus TCP/IP 10/100Mbps with automatic data rate negotiation

Power Requirement
15 to 36V DC supply (2 Watts) required

Approvals
CE/ATEX marked.
UL, cUL listed, Class I, Div. 2; Groups A, B, C, D.
EtherNet/IP, Modbus/TCP conformance tested.

Key Features & Benefits
- Configurable from standard web browser
- Universal inputs support a variety of sensors
- Thermocouple break detection (upscale or downscale) identifies sensor wiring failures
- High-resolution 16-bit Σ-∆ A/D converters ensure precise, high accuracy measurements
- Wide operational temperature range

## 966EN Ethernet Temperature Input Modules

![Module Image](image.png)

Standard model includes cage clamp terminal blocks. Optional terminals are available (see Page 26).

### Description
These modules provide an isolated Ethernet network interface for up to six input channels. Multi-range inputs accept signals from a variety of sensors and devices. High-resolution, low noise, A/D converters deliver high accuracy and reliability. 3-way isolation further improves the system performance.

### Input Ranges
Input ranges are selectable for a 3-channel group.

- **RTD**
  - 2-wire and 3-wire RTDs are supported.
  - Platinum 100 ohm (alpha = 1.3850 or 1.3911)
  - Nickel 120 ohm
  - Copper 10 ohm
- **Resistance**
  - 0 to 500 ohms

### Network Communication
EtherNet/IP or Modbus TCP/IP 10/100Mbps with automatic data rate negotiation

### Power Requirement
15 to 36V DC supply (2 Watts) required

### Approvals
- CE/ATEX marked.
- UL, cUL listed, Class I, Div 2; Groups A, B, C, D.
- EtherNet/IP, Modbus/TCP conformance tested.

### Key Features & Benefits
- Configurable from standard web browser
- 6-input stand-alone module has much lower start-up cost than multi-piece block I/O systems
- Versatile RTD or ohmic inputs support a wide variety of industrial sensors and devices
- RTD break detection (upscale or downscale) identifies sensor wiring failures
- High-resolution 16-bit Σ-∆ A/D converters ensure precise, high accuracy measurements
- Wide operational temperature range permits installation in extreme environments

### Performance Specifications

#### Input
- **Accuracy**
  - Input Type | Input Range | Accuracy (typical)
  - Pt 100 ohm -200 to 850°C | ±0.25°C
  - Ni 120 ohm -80 to 320°C | ±0.25°C
  - Cu 10 ohm -200 to 260°C | ±1.25°C
  - Resistance | 0 to 500 ohms | ±0.05 ohms
- **RTD Break Detection**
  - Upscale or downscale selection applies to all channels.
- **Noise Rejection**
  - Normal Mode: Better than 40dB @ 60Hz.
  - Common Mode: Better than 130dB @ 60Hz.
- **Input Filter Bandwidth**
  - -3dB at 3Hz, typical.
- **Input Conversion Rate**
  - 80mS per channel.

### Ordering Information
- **I/O Modules**
  - 966EN-4004

### Description

**Models**
- 967EN-4008: Industrial-grade units
- 967EN-4C08: Commercial-grade units

These modules interface high-level analog input signals to an Ethernet network. A high-performance design ensures reliable measurements and dependable operation.

Industrial-grade models add a configurable integrator/totalizer plus superior accuracy and temperature performance compared to the economical commercial-grade version.

**Input Ranges**
- ±20mA, 0-20mA, 4-20mA DC (selectable on each channel)

**Ethernet Communication**
- Modbus TCP/IP, 10/100Base-T(X)
- i2o peer-to-peer communication

**Power Requirement**
- 18 to 36V DC, 2.4W

**Approvals**
- CE, UL/cUL (industrial-grade units only)
- Zone 2, Class 1, Division 2, ABCD

---

### Key Features & Benefits

- High-resolution 16-bit A/D
- Fast scanning of all channels in 8mS
- 3-way isolation and surge suppression
- Peer-to-peer i2o communication with percent-of-span or timed-based updates
- Configurable integration/totalization function with non-volatile registers
- Dual-format 16/32-bit data registers
- Scaling registers on all channels
- Configurable sample averaging
- Automatic calibration and self-test
- User-adjustable TCP Ports 1-99,999 for advanced network configuration
- Web browser configuration with copy utility for fast setup

### Performance Specifications

#### Accuracy
- 967EN-4008: Less than 0.05% of range.
- 967EN-4C08: Less than 0.10% of range.

#### Input Impedance
- 200 ohms.

#### Operating Temperature and Humidity Ranges
- 967EN-4008: -40 to 70°C (-40 to 158°F).
- 967EN-4C08: 0 to 55°C (32 to 131°F).
- Relative humidity: 5 to 95%, non-condensing.

#### Isolation
- 3-way isolation of I/O, power, network circuits.
- Continuous: 250V AC, 354V DC.

---

### Ordering Information

Acromag
THE LEADER IN INDUSTRIAL I/O
4 or 6-channel DC current or voltage output  ◆ Ethernet/IP, Modbus TCP/IP, i20 peer-to-peer messaging

Description

Models

972EN: DC current output channels
973EN: DC voltage output channels

These modules provide up to six channels of analog output. Multi-range outputs support a wide variety of industrial devices. They can drive displays and recorders, control drives, or send analog signals to other systems. High-resolution, low noise, D/A converters deliver high accuracy and reliability. 3-way isolation further improves system performance.

Output Ranges

Ranges selectable on channel to channel basis.

- DC Current (user-selectable ranges)
  0 to 1mA, 0 to 20mA, or 4 to 20mA
- DC Voltage (user-selectable ranges)
  0 to 1V, 0 to 5V, or 0 to 10V DC

Network Communication

Ethernet/IP or Modbus TCP/IP/100Mbps with automatic data rate negotiation

Power Requirement

15 to 36V DC supply required
4.6 Watts (972EN) or 2.3 Watts (973EN)

Approvals

CE/ATEX marked.
UL, cUL listed, Class I, Div. 2; Groups A, B, C, D. Ethernet/IP, Modbus/TCP conformance tested.

Key Features & Benefits

- Configurable from standard web browser
- 6-input stand-alone module has much lower start-up cost than multi-piece block I/O systems
- Universal DC outputs support a wide variety of signals and industrial devices
- Three selectable failsafe modes (0%, last-state, or pre-defined) help prevent unsafe conditions
- Wide operational temperature range permits installation in extreme environments

Performance Specifications

◆ Output

Accuracy
Better than ±0.1% of span, typical.
1.6% for 0 to 1mA range. 0.8% for 0 to 1V range.

Digital to Analog Converter (D/A)
12-bit converter.

Current Output Compliance
12V minimum, 13V typical.

Current Output Load Resistance Range
0 to 625 ohms, typical.

Voltage Output Source Current
0 to 10mA DC, maximum.

◆ Environmental

Ambient Temperature and Humidity
Operating: 972EN models -25 to 60°C (-13 to 140°F), 973EN models -25 to 70°C (-13 to 158°F).
Storage: -40 to 85°C (-40 to 185°F).
Relative humidity: 5 to 95%, non-condensing.

Isolation
1500V AC for 60 seconds or 250V AC continuous.
3-way isolation between I/O, network, and power. Outputs share a common.

Ordering Information

NOTE: i20 function only on Modbus TCP/IP modules

Ethernet I/O: BusWorks® Series

981EN, 982EN, 983EN  Ethernet Discrete I/O Modules

Description

Models
981EN: 12 input channels
982EN: 12 output channels
983EN: 12 input/output channels

These modules provide an isolated Ethernet network interface for twelve discrete input and/or output channels. The outputs provide direct on/off, high/low, or open/close control of industrial devices. The inputs sense the status of motors, pumps, valves and other equipment. The 983EN model with tandem I/O provides output level control and status verification in one unit.

Input Range
0 to 35V DC

Output Range
0 to 35V DC

Network Communication
EtherNet/IP or Modbus TCP/IP 10/100Mbps with automatic data rate negotiation

Power Requirement
15 to 36V DC supply (2 Watts) required

Approvals
CE/ATEX marked.
UL, cUL listed, Class I; Div. 2; Groups A, B, C, D.
EtherNet/IP, Modbus/TCP conformance tested.

Key Features & Benefits

Configurable from standard web browser

12-channel stand-alone module has far lower start-up cost than multi-piece block I/O systems

0-35V DC solid-state logic interface can monitor or control a wide variety of devices

Bidirectional I/O models facilitate loopback monitoring of the output state

Socketed SIP resistors provide input and output 5.6K ohm pull-ups to the excitation supply

Three selectable failsafe modes (off, last-state, or pre-defined) help prevent unsafe conditions

Environmental

Ambient Temperature and Humidity
Operating: -25 to 70°C (-13 to 158°F).
Storage: -40 to 85°C (-40 to 185°F).
Relative Humidity: 5 to 95%, non-condensing.

Isolation
1500V AC for 60 seconds or 250V AC continuous.
3-way isolation between I/O, network, and power.

Ordering Information

NOTE: i2o function only on Modbus TCP/IP modules. 981EN does not have the i2o feature.

I/O Modules
981EN-4012 Discrete input, EtherNet Modbus TCP/IP
981EN-6012 Discrete input, EtherNet/IP
982EN-4012 Discrete output, EtherNet Modbus TCP/IP, i2o
982EN-6012 Discrete output, EtherNet/IP
983EN-4012 Discrete input/output, EtherNet Modbus TCP/IP, i2o
983EN-6012 Discrete input/output, EtherNet/IP

12-channel discrete input and/or output  Ethernet/IP, Modbus TCP/IP, i2o peer-to-peer messaging

Performance Specifications

Input (981 & 983 models)

Input Type
Twelve active-low, buffered inputs, with a common connection. Built-in 5.6K ohm pullups to excitation terminal socketed for 4-channel groups.

Input Signal Voltage Range
0 to 35V DC, maximum.

Input Impedance
100K ohms, typical.

Input Signal Threshold
TTL compatible with 100mV of hysteresis, typical.

Output (982 & 983 models)

Output Type
12 independent, open-drain, MOSFET switches.

Output Voltage and ON Resistance
0 to 35V DC max. (0 to 500mA/channel continuous). 0.28 ohms maximum ON resistance.

Model 983EN-4012 Shown (981EN-4012 & 982EN-4012 Similar)

Standard model includes cage clamp terminal blocks. Optional terminals are available (see Page 26).
16-channel discrete I/O ◆ 8 counter/timers ◆ Modbus TCP/IP communication

Description

Models
989EN-4016: Industrial-grade version
989EN-4C16: Commercial-grade (no counters)

These modules provide an isolated Ethernet interface for any input/output mix of up to 16 discrete signals. Inputs sense the status of dry contacts, switches, power supplies, and DC logic. Industrial-grade units have eight 32-bit counters with timers, alarms, and non-volatile memory for metering, totalizing, and low-frequency periodic measurement. The outputs control solid-state switching of lamps, horns, and other devices.

Input/Output Ranges
Input: 0-28V DC, 31V DC maximum
Output: 0-28V DC, 0.5A/ch max, 2A total

Counter/Timers
(Industrial-grade units)
8 up/down counters, 32-bit, 150Hz max
8 timers, 16-bit, 1mS resolution

Ethernet Communication
Modbus TCP/IP, 10/100Base-T(X)

Power Requirement
18 to 36V DC (1.33 W)

Approvals (industrial-grade only)
CE, UL/cUL
Zone 2, Class 1, Division 2, ABCD

Key Features & Benefits

- 16 solid-state discrete I/O channels (any mix of inputs/outputs)
- 3-way isolation and surge suppression
- Web browser configuration
- Automatic MDI/MDI-X negotiation
- Inputs accept 2- or 3-wire sensors and active logic switches (dry contacts, proximity, namur, 5-28V DC logic)
- Inputs detect level and change of state
- 8 configurable counter/timers
  - 32-bit up/down pulse/event counters (with non-volatile memory)
  - 16-bit periodic timers for “last pulse”
  - Momentary/latch alarms (each counter)
- Programmable debounce
  (0-65 seconds with 1mS resolution)
- Programmable power-up conditions
- Over-temperature, over-current, and over-voltage output protection
- Ability to “read-back” output states
- Watchdog timer output configurable for fail-safe or hold-last-value operation
- Self-test and auto-copy functions

Performance Specifications

- Environmental
  Operating Temperature Range
  989EN-4016: -40 to 65°C (-40 to 149°F).
  989EN-4C16: 0 to 55°C (32 to 131°F).
  Storage Temperature Range
  989EN-4016: -40 to 85°C (-40 to 185°F).
  989EN-4C16: 0 to 70°C (32 to 158°F).
  Relative Humidity
  5 to 95%, non-condensing.
  Isolation
  3-way isolation of I/O, power, network circuits.
  Continuous: 250V AC, 354V DC.

Ordering Information

- I/O Modules
  989EN-4016
  16 I/O channels with pulse counter/timers
  989EN-4C16
  Commercial-grade, 16 I/O, no counter/timers

- Accessories
  Industrial Ethernet Switches
  See Page 25.
  Hardware Accessories and Power Supplies
  See Page 26.
  Software Support
  See Page 27.
Ethernet I/O: BusWorks® Series

993EN Ethernet Analog Input Modules

16-channel single-ended analog current input    Modbus TCP/IP communication

Description

Models
993EN-4016: Industrial-grade units
993EN-4C16: Commercial-grade units

These modules interface high-level analog input signals to an Ethernet control network. A high-performance design ensures reliable measurements and dependable operation.

Industrial-grade models add a configurable integrator/totalizer plus superior accuracy and temperature performance compared to the economical commercial-grade version.

Input Ranges
±20mA, 0-20mA, 4-20mA DC (selectable on each channel)

Ethernet Communication
Modbus TCP/IP, 10/100Base-T(X)

Power Requirement
18 to 36V DC, 2.0W

Approvals
CE, UL/cUL (industrial-grade units only)
Zone 2, Class 1, Division 2, ABCD

Key Features & Benefits

■ High-resolution 16-bit A/D
■ Fast scanning of all channels in 8mS
■ 3-way isolation and surge suppression
■ Configurable integration/totalization function with non-volatile registers
■ Dual-format 16/32-bit data registers
■ Scaling registers on all channels
■ Configurable sample averaging
■ Automatic calibration and self-test
■ User-adjustable TCP Ports 1-99,999 for advanced network configuration
■ Web browser configuration with copy utility for fast setup

Performance Specifications

Accuracy
993EN-4016: Less than 0.05% of range.
993EN-4C16: Less than 0.10% of range.

Input Impedance
200 ohms.

Operating Temperature and Humidity Ranges
993EN-4016: -40 to 70°C (-40 to 158°F).
993EN-4C16: 0 to 55°C (32 to 131°F).
Relative humidity: 5 to 95%, non-condensing.

Isolation
3-way isolation of I/O, power, network circuits.
Continuous: 250V AC, 354V DC.

16-channel single-ended analog voltage input ◆ Modbus TCP/IP communication

Description

Models
994EN-4016: Industrial-grade units
994EN-4C16: Commercial-grade units

These modules interface high-level analog input signals to an Ethernet control network. A high-performance design ensures reliable measurements and dependable operation.

Industrial-grade models add a configurable integrator/totalizer plus superior accuracy and temperature performance compared to the economical commercial-grade version.

Input Ranges
±5V, ±10V DC
(selectable on each channel)

Ethernet Communication
Modbus TCP/IP, 10/100Base-T(X)

Power Requirement
18 to 36V DC, 2.0W

Approvals
CE, UL/cUL (industrial-grade units only)
Zone 2, Class 1, Division 2, ABCD

Key Features & Benefits

- High-resolution 16-bit A/D
- Fast scanning of all channels in 8mS
- 3-way isolation and surge suppression
- Configurable integration/totalization function with non-volatile registers
- Dual-format 16/32-bit data registers
- Scaling registers on all channels
- Configurable sample averaging
- Automatic calibration and self-test
- User-adjustable TCP Ports 1-99,999 for advanced network configuration
- Web browser configuration with copy utility for fast setup

Performance Specifications

Accuracy
994EN-4016: Less than 0.05% of range.
994EN-4C16: Less than 0.10% of range.

Input Impedance
4M ohms.

Operating Temperature and Humidity Ranges
994EN-4016: -40 to 70°C (-40 to 158°F).
994EN-4C16: 0 to 55°C (32 to 131°F).
Relative humidity: 5 to 95%, non-condensing.

Isolation
3-way isolation of I/O, power, network circuits.
Continuous: 250V AC, 354V DC.

Ethernet I/O: BusWorks® Series

900EN Series, EIS Series, IMC Series Industrial Ethernet Switches & Converters

◆ 900EN Series Switches

900EN Ethernet Switches
Models
900EN-S005: 5-port, unmanaged
Acromag’s Rugged 5-port industrial-grade Ethernet switches have internal intelligence for fast and easy network installation with auto data rate, flow control, and cross-over. No setup needed if used as a simple switch with Acromag I/O modules.

Ordering Information
◆ Switches
For more information please visit www.acromag.com.
900EN-S005
Ethernet switch, 5-port Copper
◆ Accessories
Hardware Accessories and Power Supplies
See Page 26.

◆ EIS Series Switches

EIS Series Ethernet Switches
Models
EIS-408: 8-port (Cu/fiber), redundancy, managed
EIS series switches are designed for harsh environments. They feature a rugged IP30 aluminum case, 300,000 hour MTBF, and power supply redundancy for dependable networking.

Ordering Information
◆ Switches
For more information please visit www.acromag.com.
EIS-408FX-M
Ethernet switch with redundancy, 6 Cu / 2 Fiber-optic, multi-mode fiber (up to 2 km).
EIS-408FX-S
Ethernet switch with redundancy, 6 Cu / 2 Fiber-optic, single-mode fiber (up to 30 km).
◆ Accessories
Hardware Accessories and Power Supplies
See Page 26.

◆ IMC Series, Converters

IMC Series Converters
Models
IMC-100A-M-T: 10/100TX to 100FX, Multi-Mode
IMC-100A-S3-T: 10/100TX to 100FX, Single Mode
Acromag’s IMC series industrial media converters convert between 10/100Base-TX and 100Base-FX cabling. They allow you to extend the cabling distance of your 100Base-FX network up to 30 kilometers.

Ordering Information
◆ Converters
For more information please visit www.acromag.com.
IMC-100A-M-T
10/100TX to 100FX Harden Media Converter, Multi-Mode 2KM, -40 to 80°C

**Spring Clamp Terminal Blocks**

Wire range: AWG #12-26

- 3-position: L = 0.66 inches (16.9 mm)
- 6-position: L = 1.26 inches (32.3 mm)

### Ordering Information

* I/O modules ship with cage clamp terminal blocks. Terminal block kits are for replacement purposes. See I/O module information for compatibility

#### Barrier Strip

- **TBK-B01**
  - Terminal block kit, two 6-position pieces
- **TBK-B02**
  - Terminal block kit, four 6-position pieces
- **TBK-B03**
  - Terminal block kit, one 3-position and three 6-position pieces

#### Spring Clamp

- **TBK-S01**
  - Terminal block kit, two 6-position pieces
- **TBK-S02**
  - Terminal block kit, four 6-position pieces
- **TBK-S03**
  - Terminal block kit, one 3-position and three 6-position pieces

### Din-Rail Mounting

For your convenience, Acromag offers several mounting accessories to simplify your system installation. Our 19" rack-mount kit provides a clean solution for mounting your I/O modules and a power supply. Or you can buy precut DIN rail strips for mounting on any flat surface.

#### Ordering Information

- **20RM-16-DIN**
  - 19" rack-mount kit with DIN rail.
- **DIN RAIL 3.0**
  - DIN rail strip, Type T, 3 inches (75mm) or 16.7 inches (425mm)

### Universal Slimline Power Supplies

#### Input Power Requirements

- 85 to 264V AC or 105 to 370V DC

#### Output

- 5V DC, 12V DC, or 24V DC
- 10W to 240W

#### Ordering Information

- **PSR-SB24**
  - Power supply, 15W, 0.65A at 24V DC
- **PSR-SD24**
  - Power supply, 60W, 2.5A at 24V DC

Visit www.acromag.com for additional models and more information.

### AC Current Sensor

- **5020-350**
  - Ethernet straight cable, CAT5, 3 feet long, shielded
- **5035-355**
  - Ethernet crossover cable, CAT5E, 5 feet long, shielded
- **4001-096**
  - USB Ethernet adapter
- **4001-110**
  - Ribbon cable, 5 feet, DB25 male to 26-pin female IDC connector, interfaces 3B/5B input modules to 958EN

# Ethernet I/O: BusWorks® Series

## Software Support

### Application Development Tools

**Description**

These software development tools help you quickly integrate Acromag Ethernet I/O with your application program.

**OPC DA Server**

This low-cost server is exclusively for use with Acromag Modbus TCP/IP Ethernet devices. The OPC Server connects Acromag’s I/O modules to your HMI, SCADA or custom-built Visual Basic / C++ applications. Easy CSV import / export capability saves development time for faster deployment.

**.NET / ActiveX Controls**

These software controls provide a fast, easy way to communicate with any Modbus/TCP slave devices connected to your PC. Within minutes, your Visual Basic, Visual C, .NET, Excel, or other compatible applications will be talking Modbus protocol.

**Function Libraries with C Source Code**

Our C library of function routines speeds framing of Modbus messages. Examples help link your code with provided function calls to configure, read, and write to Acromag I/O modules. Ideal for Windows, Linux, VxWorks, and QNX OS.

**Key Features & Benefits**

- High-Speed OPC connectivity to all Acromag Modbus TCP/IP devices
- OPC DA Server supports all OPC-compliant HMI and SCADA applications
- ActiveX and .NET controls enable fast, easy communication with any Modbus TCP/IP or Modbus RTU slave device
- ActiveX and .NET controls support Visual Basic, Visual C++ and Excel applications
- Modbus C Libraries enable use with Linux, VxWorks, QNX, and other OS platforms
- Free evaluation versions
