## Important Field Notice

**To:** Current users of the #5025-551-x Cable Assembly  
**From:** Russell Nieves  
**Date:** May 18, 2018

**Re:** Change in Status for the #5025-551-x Cable Assembly

Due to the inability to have the shielded cable listed manufactured for us, Acromag has elected to End-Of-Life these cables effective immediately. Based on current availability, we have 23 units in stock and once they are sold there will be no more available.

There is a drop-in replacement available (5025-550-x) and is on our website. The main difference is the replacement cables are no longer shielded. This notification does not alter any current purchase orders. If you have any questions regarding this announcement please contact us.

Respectfully,

*Russell J Nieves*

Russ Nieves

Vice President of Sales
