Industry Pack Modules

**IP482/483/484 Counter/Timers**

- **IP482**: Ten 16-bit counters — TTL
- **IP483**: Five 16-bit counters — TTL, and Two 16-bit counters — RS422
- **IP484**: Five 16-bit counters — RS422

Several models with a variety of configurations provide up to ten counter/timer channels for counting events, generating waveform control signals, measuring pulse-widths or periodic rates, and monitoring operations.

Support for internal or external triggering simplifies the synchronization of operations to specific events. Counter functions can use internally generated clocks or an externally supplied clock.

**Features**
- Up to ten 16-bit counter/timers (IP482)
- Available with both TTL and RS422 driver interface (IP483 only)
- 8 or 32MHz clock time base
- Single counter/timer modes:
  - Event counting
  - Frequency measurement
  - Period/pulse-width measurement
  - Quadrature position measurement
  - Square wave/pulse train generation
  - Time/period interrupter
  - Pulse width generation
- Extended temperature option (-40 to 85°C)

**Benefits**
- Most configuration is handled by a single register which minimizes programming.
- Pullups are socketed for easy adjustment.

**Specifications**

**Counter/Timers**

Counter/timer configuration:
- IP482: Ten 16-bit counters — TTL
- IP483: Five 16-bit counters — TTL, and Two 16-bit counters — RS422
- IP484: Five 16-bit counters — RS422

Clock frequency: 8 or 32MHz depending on IP bus speed.

Field I/O: Front panel SCSI-3 connector.

8MHz carrier operation:
- Selectable internal clock frequency: 0.5, 1, 2, 4, or 8 MHz.
- External clock: 2MHz maximum frequency.
- Minimum input event: 125ns.
- Minimum pulse measurement: 125ns.
- Minimum period measurement: 300ns.
- Minimum gate/trigger pulse: 125ns.

32MHz carrier operation:
- Selectable internal clock frequency: 2, 4, 8, 16, or 32 MHz.
- External clock: 8MHz maximum frequency.
- Minimum input event: 3.125ns.
- Minimum pulse measurement: 31.25ns.
- Minimum period measurement: 150ns.
- Minimum gate/trigger pulse: 31.25ns.

Mode accuracy (with external clocking):
- Waveform generation: 1% of total range.
- Watchdog: Timeout occurs within ±1 clock cycle.
- Pulse/period measurement: ±1 clock cycle.

Interrupts: Supported for watchdog timer time-out, event count complete, pulse width or periodic rate measurement complete, pulse wave complete (one-shot mode), successive waveform generation (continuous).

Triggering/gate: Programmable via register write or external trigger. Minimum pulse width 125ns. Line may be used for gating of counter.

Counter trigger: Interface for triggering counter functions. Input level is TTL or RS422 differential digital.

Counter input: Interface for events and pulse/period measurements. Also triggers load of watchdog timer register. Level is TTL or RS422 differential digital.

TTL compatibility: $V_{HI} = 2.0V$ and $V_{IL} = 0.8V$. inputs are buffered and include 4.7K pull-ups to +5V.

Counter output: Level is TTL or RS422 differential digital.

**IP Compliance (ANSI/VITA 4)**

Meets IP specifications per ANSI/VITA 4-1995.

IP data transfer cycle types supported: Input/output (IOSel*), ID read (IDSel*), Interrupt select (INTSel*).

Access times (8MHz or 32MHz clock):
- ID space read: 0 wait states (250ns cycle).
- Registers read/write: 1 wait state (500ns cycle).
- Interrupt read/write: 0 wait states (250ns cycle).

**Environmental**

Operating temp.: 0 to 70°C or -40 to 85°C (E versions)

Storage temperature: -55 to 125°C.

Relative humidity: 5 to 95% non-condensing.

Power: Consult factory.

MTBF: Hours at 25°C, MIL-HDBK-217F, Notice 2

IP482 2,043,105; IP483 3,289,625; IP484 7,065,540

**Ordering Information**

**Industry Pack Modules**
- IP482: Ten 16-bit counters — TTL
- IP482E: Same as IP482 plus extended temperature range
- IP483: Five 16-bit counters — TTL, and Two 16-bit counters — RS422
- IP483E: Same as IP483 plus extended temperature range
- IP484: Five 16-bit counters — RS422
- IP484E: Same as IP484 plus extended temperature range

Acromag offers a wide selection of Industry Pack Carrier Cards.

**Software**

- IPSW-API-VXW: VxWorks® software support package
- IPSW-API-QNX: QNX® software support package
- IPSW-API-WIN: Windows® DLL driver software support package
- IPSW-LINUX: Linux™ support (website download only)
