

Dear %%First Name%%,

This month we feature our Industrial Instrumentation Applications eBook. And in case you missed it last month, we have a video that details sensor and instrument types and illustrates several application solutions. We then feature a few of our isolated frequency transmitters that excel in the applications mentioned in the video.

WHITE PAPERS

Industrial Instrumentation Applications eBook

This application ebook details how you can use Acromag instrumentation to interface with other instrumentation for many different industrial applications.

Transmitter Applications with Frequency / Pulse Sensors

Learn sensor/instrument types in this video including magnetic pickup, photoelectric, proximity, capacitive, turbine flow meter, and tachometers. Applications using frequency and pulse sensors are explained and then Acromag's interface solution is described.

[Watch now](#)

TT239

- USB configurable two-wire transmitter
- Multi-range frequency/pulse input
- 4-20mA output (sink/source)
- 12-32V DC loop/local power

[View Here](#)

TT339

- USB configurable four-wire transmitter
- Multi-range frequency/pulse input
- Universal current/voltage output
- 12-32V DC local/bus power

[View Here](#)

841T-0500

- Windows based software configuration
- External range adjustments
- Multi-range frequency/pulse input
- Universal current/voltage output
- 10-36V DC local power

[View Here](#)

989EN-4016

- Internet Browser configured
- DIO with counter inputs
- Modbus TCP/IP communications
- 18-36V DC local power
