PMC-LX40/LX60  
User-configurable  
Virtex-4 FPGA Modules  
with plug-in I/O

- PMC-LX40: 41,472 logic cells (XC4VLX40)  
- PMC-LX60: 59,904 logic cells (XC4VLX60)

Description
Acromag’s PMC-LX boards use a high-performance Xilinx® Virtex-4™ FPGA, but maintain a relatively low price point. They are optimized for high-performance logic, featuring a high logic-to-feature ratio and a high I/O-to-feature ratio. Two modules let you select an FPGA to match your logic requirements.

Although there is no limit to the uses for Acromag’s FPGA boards, several applications are ideal for this new technology. Typical uses include hardware simulation, communication processing, in-circuit diagnostics, military servers, and telecommunication.

I/O processing is handled on a separate mezzanine card that plugs into the FPGA base board. A variety of these external I/O cards offer an interface for your analog and digital I/O signals. See the AXM I/O Card for more details. Additionally, 64 I/O lines are supported via the rear (J4) connector.

Plenty of DRAM memory is available for receipt and transfer of high-speed data from the I/O data ports on the front and rear of the board. Dual Ported SRAM memory is supplied for storage of data to be passed, via DMA transfer, to the PCI bus. One of the dual ports is attached to the FPGA and the other to the local bus.

The PCI bus interface is handled by a PLX® PCI 9656 device which provides 64-bit 66MHz bus mastering with dual-channel DMA support.

Take advantage of the optional conduction cooling for use in hostile environments. Conduction cooling provides efficient heat dissipation in environments where there is inadequate cooling air flow.

Acromag provides software utilities and examples to simplify your programming and get you started quickly. A JTAG interface enables on-board VHDL simulation.

Features
- Customizable FPGA (Xilinx Virtex-4 XC4VLX40/60) with up to 60K logic cells and 64 XtremeDSP™ slices
- Supports both front and rear I/O
- Plug-in I/O modules are available for front mezzanine
- 64 I/O lines supported with direct connection to FPGA via rear (J4) connector
- FPGA code loads from PCI bus or flash memory
- 256K x 36-bit dual-ported SRAM
- 32Mb x 32-bit DDR DRAM
- Supports dual DMA channel data transfer to CPU
- Supports both 5V and 3.3V signalling
- Conduction cooled or 0 to 70°C operating range

Specifications
FPGA
- FPGA: Xilinx Virtex-4 FPGA  
- PMC-LX40: XC4VLX40 FPGA with 41,472 logic cells and 64 DSP slices  
- PMC-LX60: XC4VLX60 FPGA with 59,904 logic cells and 64 DSP slices
- FPGA configuration: Downloadable via PCI bus or from flash memory.
- Example FPGA program: VHDL provided implements interface to PCI bus IC, interface to dual port SRAM, PLL control, ADC, and DAC control. Program requires user proficiency with Xilinx software tools. See Engineering Design Kit.

I/O Processing
- AXM modules: for front mezzanine:  
  Acromag AXM modules attach to the board to provide I/O. A variety of modules are available and are sold separately.

Environmental
- Operating temperature: 0 to 70°C
- Storage temperature: -55 to 105°C
- Relative humidity: 5 to 95% non-condensing
- Power: Consult factory. Operates from 3.3V supply.
- MTBF: Hours at 25°C MIL-HDBK-217F, Notice 2  
  PMC-LX40: 773,246; PMC-LX60: 870,489

Ordering Information

**PMC Modules**
- **PMC-LX40**
  - User-configurable Virtex-4 FPGA with 41,472 logic cells
- **PMC-LX60**
  - User-configurable Virtex-4 FPGA with 59,904 logic cells
- **PMC-LX-EDK**
  - Engineering Design Kit (one kit required)

**AXM Plug-In I/O Modules**
- **AXM-A30**
  - 2 16-bit 100MHz A/D channels
- **AXM-D02**
  - 30 RS485 differential I/O channels
- **AXM-D03**
  - 16 CMOS and 22 RS485 differential I/O channels
- **AXM-D04**
  - 30 LVDS I/O channels
- **AXM-??**
  - Custom I/O configurations available, call factory.

**Software** (see software documentation for details)
- **PMCSW-API-VXW**
  - VxWorks® software support package
- **PCISW-API-WIN**
  - Windows® DLL software support
- **PCISW-API-LNX**
  - Linux™ support (website download only)
