Dear **Engineer**,

This month we are excited to announce new TT Series transmitters for temperature or resistance measurement and our Ethernet XT modules now support Profinet communications. We also have a new Western Regional Sales Manager to assist you with your measurement & control solutions.

For more information, call our sales engineers at 877-295-7035 to discuss your application or request a quote.

New RTD, Thermistor and Resistance Input Transmitters with Easy USB Configuration

Acromag's [TT Series transmitters](#) added a number of new models for signal conditioning of temperature and resistive sensor signals. These new units accept inputs from RTDs (Pt, Ni, Cu), thermistors, potentiometers, slidewires,

and rheostats. Select from two-wire loop-powered or four-wire DC-powered versions to isolate and convert your sensor inputs to 4-20mA or 0-10V DC

control signals. They are very easy to configure using a PC connected via a USB cable. Free software helps you quickly select I/O ranges, filtering levels, fault detect, and other settings then precisely scale zero/full-scale output values.

The space-saving TT200 (12.5mm) and TT300 (17.5mm) models deliver high accuracy, linearity, and stability plus a rugged design for long-term reliability. They are highly immune to electrical noise, resist shock and vibration, and can withstand high-voltage surges. UL Class I Division 2 Zone 2 hazardous location approvals are pending.

2-Wire (Loop-Powered) Models

- [TT234](#) Potentiometer / thermistor input
- [TT235](#) RTD input

Ethernet Digital I/O Modules Now Support Profinet Communication

Acromag's [BusWorks XT](#) Ethernet I/O modules can now interface discrete signal devices on Profinet, Ethernet/IP and Modbus TCP/IP networks. They are ideal for a variety of remote monitoring and control applications. The new 16-channel distributed I/O modules are configurable for any mix of discrete inputs and outputs. The outputs support either sink or source wiring ([XT1110](#) or [XT1120](#)) applications and include built-in

read-back capability. Dual Ethernet ports enable daisy-chaining of modules to simplify installation and reduce costs.

Acromag Announces New Sales Manager

Acromag is pleased to announce that Mr. Bill Whitmer has joined our Process Division Team as Western Regional Sales Manager. Bill comes to Acromag with over 15 years of successful experience in the industrial test, automation, and OEM industries. His background includes a BSEE degree and increasingly successful responsibilities ranging from sales engineering to business development. We're very

excited to have him on board!

Please help us welcome Bill to the Acromag team; you can contact him at 248-295-0863 or bwhitmer@acromag.com.

Upcoming Events

Show: [hi \[13\] Nordens Storste Industrimesse](#)

Acromag Represented by:
[Ins-Scandinavia](#)

Location: Herning - Denmark

Date: September 3-6, 2013

**SHIPS FROM STOCK
WITHIN 24 HOURS**

We keep a large inventory so most products are ready to ship the same day or the next.

**2-YEAR WARRANTY
PROTECTION**

An extended warranty is available on most products for an extra level of protection at no extra charge.

**AS9100/ISO 2001 CERTIFIED
QUALITY**

Acromag's quality management system is certified to meet global standards for consistent quality.
