IntelliPack®: 800 Series

IntelliPack 800 Series Signal Conditioners

800A Models

**Single input models**
- 801A: Universal temperature input (thermocouple, RTD, or DC mV); One DPDT relay or two SPDT relays
- 811A: DC voltage/current* input; One DPDT relay or two SPDT relays

**Dual input models**
- 812A: DC volt./current* inputs; Two SPDT relays
- 822A: Thermocouple inputs; Two SPDT relays
- 832A: RTD inputs; Two SPDT relays

* AC current sensor option available.IntelliPack alarms compare inputs against user-defined limit setpoints to control built-in relays.

Each unit offers a selection of input ranges and alarm functions to handle a broad range of applications. As your needs change, you can easily reconfigure the unit for different ranges or functions. Alarm functions available on all models include on/off controller, limit alarm, deviation alarm, rate-of-change alarm, and peak/valley detection. Other functions are also possible; please consult the factory.

Setup is very easy. IntelliPack alarms are configured through a user-friendly Windows XP/Vista/7 program. Field adjustments and recalibration are quickly performed with front-panel push-buttons and status LEDs. Once configured, IntelliPacks operate independent of any host computer.

**Key Features & Benefits**

**General Operation**
- Advanced microcontroller has integrated, downloadable flash memory and EEPROM for intelligent signal processing.
- Windows XP/Vista/7 software configuration speeds setup and replacement.
- Push-button reprogrammability facilitates changes in the field without a host PC.
- Built-in self-diagnostic routines operate upon power-up and during operation for easy maintenance and troubleshooting.
- 3-way isolation separates inputs, power, and relay contacts from each other.
- EMC compliant. Ruggedized circuitry meets directives to provide increased transient immunity and low emissions.
- Wide ambient temperature range ensures reliable performance from -25 to 70°C.
- Wide DC supply range with diode-coupled reverse polarity protection is useful for redundant supplies and battery backup.

**Alarm Operation**
- Multi-purpose inputs accept numerous ranges to reduce spare stock requirements.
- User-programmable alarm operation lets you select or change alarm functions (see next page for supported functions).
- Dual alarm operation lets you perform two alarm functions at the same time.
- High-resolution Sigma-Delta A/D converter delivers high accuracy with low noise.
- Input excitation supply on each input provides power for a two-wire transmitter.
- High-power relays switch voltages up to 230V AC at 5A.
- User-programmable deadband (100%) on each setpoint eliminates relay chatter and prolongs contact life.
- User-programmable relay reset enables automatic alarm reset or latching alarm with manual reset.
- Failsafe/non-failsafe operation lets you set the default relay position.
- Relay delay feature lets you set the reaction time to filter transients.
- Thermocouple and RTD signal processing performs linearization, up/downscale break detection, reference-junction compensation and other functions.

Acromag

Tel: 248-295-0880 Fax: 248-624-9234 sales@acromag.com www.acromag.com 30765 S Wixom Rd, Wixom, MI 48393 USA
Alarm functions

Each IntelliPack alarm unit includes all the alarm functions listed below. Acromag's configuration software helps you quickly define or modify the relay operation for your application. Unique, fill-in-the-blank screens are provided for each alarm type.

Limit Alarm

Limit alarms monitor a single setpoint (high or low) for an alarm condition. The relay enters the alarm state when the input signal exceeds the setpoint for a user-defined time period. This time period helps filter input transients. The relay remains in the alarm state until the input signal retreats past the setpoint and any applied deadband.

Window (Band-Pass) Alarm

Window alarms use two setpoints to monitor for an alarm condition. This allows both a high and low setpoint to be defined for a single input signal. The two setpoints define a minimum/maximum operating range or a window. This function is commonly referred to as a Window, Guard, or Band-Pass alarm.

The relay enters the alarm state when the input level rises or falls outside the window for a user-defined time period (to filter input transients). The relay remains in alarm state until the signal retreats back into the window, plus any applied deadband.

On/Off Controller

An on/off controller uses two setpoints to toggle a relay. No deadband is applied. This alarm type is often used for level control applications, such as filling or emptying a container (pump/valve control).

The relay enters the alarm state when the input exceeds the “on” setpoint for a user-defined time period. The relay remains in the alarm state until the input signal retreats past the “off” setpoint.

Deviation Alarm

(Dual Input Models Only)

The deviation alarm generates an alarm condition based on the difference between two input signals. One signal serves as the reference input. The second input signal is monitored for a user-defined deviation value (positive, negative, or absolute) with respect to the reference input. This alarm type is useful for controlling temperature and flow.

The relay enters the alarm state when the deviation exceeds the limit for a user-defined time period. The relay remains in the alarm state until the deviation decreases below the limit, plus any applied deadband.

Peak/Valley Detection Alarm

This function detects when the input signal reaches a maximum (peak) or minimum (valley) value. Peak/valley alarms are useful for torque and pressure testing applications as well as for monitoring temperature and chemical reactions.

The detection function activates only after the input exceeds a user-defined threshold level. Once activated, the alarm unit monitors the input signal for a decrease on a rising signal or an increase on a falling signal. A relay trips when the signal exceeds a user-defined deadband following the peak/valley. The relay remains in alarm state until the signal reaches a user-defined dropout value.

Rate-of-Change

This function monitors an input for a change in value with respect to time. Intellipacks monitor absolute rate-of-change and can activate for increasing or decreasing rates.

The relay enters alarm state when the input rate-of-change exceeds the user-defined rate limit for a one second time period. The relay remains in the alarm state until the rate-of-change moves past a specified dropout level for a one second time period.

Other Alarm Functions

Internal intelligence and downloadable flash memory allow Intellipacks to perform many other functions. If your application differs from the standard alarms above, please call the factory regarding the possibility of other functions custom-tailored to your needs.

### Software Configuration Examples

**Limit Alarms, Window Alarms, and On/Off Controllers**

![Property sheet to configure a window alarm. Limit alarms and on/off controllers are similar. Typical applications: pump control, early warning alert, safety shutdown.](image1)

**Deviations Alarms**

![Property sheet to configure a deviation alarm. Positive, negative, and absolute deviation alarms are supported. Typical applications: speed tracking/monitoring, consistent batch temperature measurement, flow leak detection.](image2)
Peak/Valley Alarms

A property sheet to configure a peak/valley alarm.
Typical applications: force measurement, pressure testing, chemical mixing.

Rate-of-Change Alarms

A property sheet to configure a rate-of-change alarm.
Typical applications: injection molding, speed sensing, monitoring chemical reactions.
IntelliPack® 800 Series

Intelligent Alarms

801A Alarms
Thermocouple, RTD, and Millivolt Input

Models
801A-0100: Alarm with one DPDT relay
801A-0200: Alarm with two SPDT relays

Input Ranges
TC types: J, K, T, S, E, B, N
Millivolt: ±15.625mV to ±1.0V DC
RTD: 100 ohm Pt, 120 ohm Ni, 10 ohm Cu
Resistance: 0 to 500 ohms

Alarm Outputs
Single DPDT relay (801A-0100),
Dual SPDT relay (801A-0200)

Power Requirement
10 to 36V DC

Approvals
UL, cUL listed.

Description
IntelliPack alarms compare inputs against user-defined limit setpoints to control built-in relays.
Each unit offers a selection of input ranges and alarm functions to handle a broad range of applications. As your needs change, you can easily reconfigure the unit for different ranges or functions. Alarm functions available on all models include on/off controller, limit alarm, window alarm, deviation alarm, rate-of-change alarm, and peak/valley detection.

Setup is very easy. IntelliPack alarms are configured through a user-friendly Windows XP/Vista/7 program. Field adjustments and recalibration are quickly performed with front-panel push-buttons and status LEDs. Once configured, IntelliPacks operate independent of any host computer.

Special Features
- Integrated microcontroller performs intelligent signal processing for advanced alarm functions.
- Windows XP/Vista/7 software configuration speeds setup and replacement.
- Push-button reprogrammability facilitates changes in the field without a host PC.
- Multi-purpose inputs accept numerous ranges to reduce spare stock requirements.
- High-resolution Sigma-Delta A/D converter delivers high accuracy with low noise.

Input excitation supply on each input provides power for a two-wire transmitter.

Dual alarm operation lets you perform two alarm functions at the same time.

Performance

General Input
Analog to Digital (A/D) Converter
16-bit Σ-Δ A/D converter.

Resolution
±0.005% of span or 0.1°C/LSB. ADC typically yields resolutions finer than 0.1°C/LSB.

Ambient Temperature Effect
Better than ±0.005% of input span per °C or ±1µV, whichever is greater.

Noise Rejection
Normal Mode: Better than 40dB @ 60Hz.
Common Mode: Better than 130dB @ 60Hz.

Input Filter
Normal mode filtering, plus digital filtering optimized and fixed per input range within Σ-Δ ADC.

Input Response Time
Less than 200mS to 98% of final value for a step change in the input. A software programmable delay can be implemented for filtering transients.

Relay Time Delay
Adjustable alarm delay of up to 25 seconds.

Input Overvoltage Protection
Bipolar Transient Voltage Suppressors (TVS).

2, 3, or 4-wire configurations supported. Module provides sensor excitation, linearization, lead-wire compensation, and sensor break detection.

**Output**
Relay (801A-0100 models)
One DPDT electro-mechanical relay.
Contact material Silver Nickel (AgNi 90/10).

Relays (801A-0200 models)
Two independent SPDT electro-mechanical relays.
Contact material Silver-Cadmium Oxide (AgCdO).

**Expected Mechanical Life**
20 million operations.

**Environmental**
Ambient Temperature
Operating: -25 to 70°C (-13 to 158°F).
Storage: -40 to 85°C (-40 to 185°F).

**Relative Humidity**
5 to 95%.

**Power Requirements**
10 to 36V DC. 55mA @ 24V. 75mA @ 15V.

**Isolation**
3-way (input/output/power), 1500V AC for 60 seconds or 250V AC continuous.

**Radiated Field Immunity (RFI)**
EN61000-4-2, EN50082-1.

**Electromagnetic Field Immunity (EMI)**
No relay trips will occur beyond ±0.25% of input span from switching solenoids, commutator motors, and drill motors.

**Electrical Fast Transient (EFT)**
EN61000-4-4, EN50082-1.

**Surge Withstanding Capability (SWC)**
EN61000-4-4, EN50082-1.

**Electrostatic Discharge (ESD)**
EN61000-4-5, EN50082-1.

**Physical**
**Enclosure**
Case: Self-extinguishing NYLON type 6.6 polyamide thermoplastic UL94-V2, color beige; general purpose NEMA Type 1 enclosure.

**Connectors**
Removable terminal blocks.
Wire Range: AWG #14-22 (AWG #12 stranded only).

**Printed Circuit Boards**
Military grade FR-4 epoxy glass circuit board.

**Dimensions**
1.05W x 4.68H x 4.35D inches.
26.7W x 118.9H x 110.5D millimeters.

**Shipping Weight**
1 pound (0.45 Kg) packed.

**Ordering Information**
IMPORTANT: All IntelliPacks require initial software configuration (order 800C-SIP).
See Note 1 below.

801A-0100
IntelliPack alarm unit.
One TC/RTD/millivolt input, one DPDT relay.

801A-0200
Same as above except two SPDT relays.

800C-SIP
Software Interface Package.
Only one kit is required for all IntelliPack models.
See diagram on Page 83 for included parts.

5034-225
USB-to-RS232 adapter. See page 121 for more info.

PSSR-VD24
Power supply (24V DC, 2.1A).
See Power Supplies on Page 199.

TBK-801
Optional terminal block kit, barrier strip style, 2 pcs.
(Does not include terminal block for input wiring).

TBK-501
Optional terminal block kit, spring clamp style, 2 pcs.
(Does not include terminal block for input wiring).

**Encapsulation**
Type 1 enclosure.

**Case**
Self-extinguishing NYLON type 6.6 polyamide thermoplastic UL94-V2, color beige; general purpose NEMA Type 1 enclosure.

**Enclosure**
Military grade FR-4 epoxy glass circuit board.

**Dimensions**
1.05W x 4.68H x 4.35D inches.
26.7W x 118.9H x 110.5D millimeters.

**Shipping Weight**
1 pound (0.45 Kg) packed.

**Ordering Information**
IMPORTANT: All IntelliPacks require initial software configuration (order 800C-SIP).
See Note 1 below.

801A-0100
IntelliPack alarm unit.
One TC/RTD/millivolt input, one DPDT relay.

801A-0200
Same as above except two SPDT relays.

800C-SIP
Software Interface Package.
Only one kit is required for all IntelliPack models.
See diagram on Page 83 for included parts.

5034-225
USB-to-RS232 adapter. See page 121 for more info.

PSSR-VD24
Power supply (24V DC, 2.1A).
See Power Supplies on Page 199.

TBK-801
Optional terminal block kit, barrier strip style, 2 pcs.
(Does not include terminal block for input wiring).

TBK-501
Optional terminal block kit, spring clamp style, 2 pcs.
(Does not include terminal block for input wiring).

**NOTE 1:** To order factory configuration, call Acromag for a configuration form which must accompany your order. Also, append “-C” to model number (example: 801A-0200-C). 800C-SIP kit is still recommended.

**Software Configuration**
Units are fully programmable via the Windows XP/Vista/7 IntelliPack Configuration Program. Configuration downloads from PC through EIA232 serial port using Acromag 800C-SIP kit.

**Field Configuration**
Setpoint and deadband are configurable via push-buttons and a standard calibrator.

**LED Indicators**
LEDs indicate power, status, and alarm.
IntelliPack® 800 Series

IntelliPack® 811A Alarm, 812A Dual Alarm

DC Current, DC Voltage, and AC Current Input

Models
811A-0100: Alarm with one DPDT relay
811A-0200: Alarm with two SPDT relays
812A-0200: Dual alarm with two SPDT relays

Input Ranges
DC Current: 0 to 22mA
DC Voltage: ±100V DC
AC Current: 0 to 20A AC (with AC current sensor)

Alarm Outputs
Single DPDT electro-mechanical 5A relay (-0100),
Dual SPDT electro-mechanical 5A relays (-0200)

Power Requirement
10 to 36V DC

Approvals
UL, cUL listed.

AC Current Sensor Model 5020-350 (ordered separately)

Description
IntelliPack alarms compare inputs against user-defined limit setpoints to control built-in relays. Each unit offers a selection of input ranges and alarm functions to handle a broad range of applications. As your needs change, you can easily reconfigure the unit for different ranges or functions. Alarm functions available on all models include on/off controller, limit alarm, window alarm, deviation alarm, rate-of-change alarm, and peak/valley detection.

Setup is very easy. IntelliPack alarms are configured through a user-friendly Windows XP/Vista/7 program. Field adjustments and recalibration are quickly performed with front-panel push-buttons and status LEDs. Once configured, IntelliPacks operate independent of any host computer.

Special Features
- Integrated microcontroller performs intelligent signal processing for advanced alarm functions.
- Windows XP/Vista/7 software configuration speeds setup and replacement.
- Push-button reprogrammability facilitates changes in the field without a host PC.
- Multi-purpose inputs accept numerous ranges to reduce spare stock requirements.
- High-resolution Sigma-Delta A/D converter delivers high accuracy with low noise.

Input excitation supply on each input provides power for a two-wire transmitter.

Dual alarm operation lets you perform two alarm functions at the same time.

Performance

General Input
Analog to Digital (A/D) Converter
16-bit Σ-Δ A/D converter.

Ambient Temperature Effect
Better than ±0.005% of input span per °C or ±1µV, whichever is greater.

Noise Rejection
Normal Mode: Better than 40dB @ 60Hz.
Common Mode: Better than 100dB @ 60Hz.

Input Filter
Normal mode filtering, plus digital filtering optimized and fixed per input range within Σ-Δ ADC.

Input Response Time
Less than 100mS to 98% of final value for a step change in the input. A software programmable delay can be implemented for filtering transients.

Relay Time Delay
Adjustable alarm delay of up to 25 seconds.

Input Overvoltage Protection
Bipolar Transient Voltage Suppressors (TVS).

Accuracy (DC Voltage/Current Inputs)
Better than ±0.05% of input span.

Continued on next page.
**Signal Conditioners**

**DC Current Input**
- **DC Current Input Range**
  - Input Ranges | Resolution
  - 0 to 5mA DC | 189nA/LSB
  - 0 to 22mA DC | 757nA/LSB
- **DC Current Input Impedance**
  24.9 ohms.
- **Excitation Supply (for 2-wire instruments)**
  +15V DC, 24mA maximum.

**DC Voltage Input**
- **DC Voltage Input Ranges**
  - Input Ranges | Resolution
  - ±100V DC | 3.77mV
  - ±50V DC | 1.88mV
  - ±25V DC | 942µV
  - ±12V DC | 471µV
  - ±6V DC | 236µV
  - ±3V DC | 118µV
- **Input Impedance**
  Greater than 500K ohms.

**AC Current Input**
- **AC Current Input Range (optional)**
  An optional external AC current sensor is required to monitor AC current signals (Model 5020-350).
  - AC Current Range | Primary Turns
    - 0 to 20A AC | 1
    - 0 to 10A AC | 2
    - 0 to 5A AC | 4
    - 0 to 2A AC | 10
    - 0 to 1A AC | 20

**Output**
- **Relay (811A-0100 model)**
  One DPDT electro-mechanical relay.
  Contact material Silver Nickel (AgNi 90/10).
- **Relays (811A-0200, 812A-0200 models)**
  Two independent SPDT electro-mechanical relays.
  Contact material Silver-Cadmium Oxide (AgCdO).
- **Relay Ratings (CSA ratings)**
  25V DC @ 5A.
  120V/240V AC @ 5A.
- **Expected Mechanical Life**
  20 million operations.

**Environmental**
- **Ambient Temperature**
  Operating: -25 to 70°C (-13 to 158°F).
  Storage: -40 to 85°C (-40 to 185°F).
- **Relative Humidity**
  5 to 95%.
- **Power Requirements**
  811A:
  - 10 to 36V DC. 70mA @ 24V. 110mA @ 15V.
  812A:
  - 10 to 36V DC. 110mA @ 24V. 155mA @ 15V.

**Isolation**
- 3-way (input/output/power).
- 1500V AC for 60 seconds or 250V AC continuous.

**Configuration**
- **Software Configuration**
  Units are fully programmable via the Windows XP/Vista/7 IntelliPack Configuration Program. Configuration downloads from PC through EIA232 serial port using Acromag 800C-SIP kit.

**Field Configuration**
- Setpoint and deadband are configurable via push-buttons and a standard calibrator.
- **LED Indicators**
  LEDs indicate power, status, and alarm.

** Thermocouple Break Detection **

- Upscale or downscale.

** DC Millivolt Input **

- **DC Millivolt/Voltage Input Ranges**
  - ±10V ±125mV ±31.25mV
  - ±500mV ±62.5mV ±15.625mV
  - ±250mV

** Millivolt Accuracy **

- Better than ±0.05% of input span.

** Output **

- **Relays**
  - Two independent SPDT electro-mechanical relays.
  - Contact material Silver-Cadmium Oxide (AgCdO).
  - Relay Ratings (CSA ratings)
    - 25V DC @ 5A.
    - 120/240V AC @ 5A.
  - Expected Mechanical Life
    - 20 million operations.

** Environmental **

- **Ambient Temperature**
  - Operating: -25 to 70°C (-13 to 158°F).
  - Storage: -40 to 85°C (-40 to 185°F).
  - Relative Humidity
    - 5 to 95%.
  - Power Requirements
    - 10 to 36V DC. 60mA @ 24V. 90mA @ 15V.
  - Isolation
    - 3-way input/output/powers.
    - 1500V AC for 60 seconds or 250V AC continuous.
  - Radiated Field Immunity (RFI)
    - EN61000-4-2, EN50082-1.
  - Electromagnetic Field Immunity (EMI)
    - EN61000-4-3, EN50082-1.
  - Radiation Field Immunity (RFI)
    - EN61000-4-2, EN50082-1.
  - Electrical Fast Transient (EFT)
    - EN61000-4-4, EN50082-1.
  - Electrostatic Discharge (ESD)
    - EN61000-4-2, EN50082-1.
  - Surge Withstanding Capability (SWC)
    - EN61000-4-4, EN50082-1.
  - Electrical Fast Transient (EFT)
    - EN61000-4-4, EN50082-1.
  - Electrostatic Discharge (ESD)
    - EN61000-4-2, EN50082-1.
  - Radiation Emissions
    - EN50081-1 for Class B equipment.

** Ordering Information **

** IMPORTANT:** All IntelliPacks require initial software configuration (order 800C-SIP).

- **822A-0200**
  - IntelliPack alarm unit.
  - Two thermocouple/millivolt inputs, two SPDT relays.
  - Software Interface Package.
  - Only one kit is required for all IntelliPack models.
  - See diagram on Page 83 for included parts.
  - 5034-225 USB-to-RS232 adapter. See page 121 for more info.
  - PSSR-VD24 Power supply (24V DC, 2.1A).
  - See Power Supplies on Page 199.
  - TBK-801 Optional terminal block kit, barrier strip style, 2 pcs.
  - (Does not include terminal block for input wiring.)
  - TBK-501 Optional terminal block kit, spring clamp style, 2 pcs.
  - (Does not include terminal block for input wiring.)

** Software Configuration **

- Units are fully programmable via the Windows XP/Vista/7 IntellPack Configuration Program. Configuration downloads from PC through EIA232 serial port using Acromag 800C-SIP kit.

** Field Configuration **

- Setpoint and deadband are configurable via push-buttons and a standard calibrator.

** LED Indicators **

- LEDs indicate power, status, and alarm.

** Physical **

- **Enclosure**
  - Case: Self-extinguishing NYLON type 6.6 polyamide thermoplastic UL94-V-2, color beige; general purpose NEMA Type 1 enclosure.
  - **Connectors** (Removable terminal blocks)
    - Wire Range: AWG #14-22 (AWG #12 stranded only).
  - **Printed Circuit Boards**
    - Military grade FR-4 epoxy glass circuit board.
  - **Dimensions**
    - 1.05W x 4.68H x 4.35D inches.
    - 26.7W x 118.9H x 110.5D millimeters.
  - **Shipping Weight**
    - 1 pound (0.45 Kg) packed.

** Printed Circuit Board Mounting **

- Connectors (Removable terminal blocks)
  - Wire Range: AWG #14-22 (AWG #12 stranded only).
  - Printed Circuit Boards
    - Military grade FR-4 epoxy glass circuit board.
  - Dimensions
    - 1.05W x 4.68H x 4.35D inches.
    - 26.7W x 118.9H x 110.5D millimeters.
  - Shipping Weight
    - 1 pound (0.45 Kg) packed.

** Ordering Information **

** IMPORTANT:** All IntelliPacks require initial software configuration (order 800C-SIP).

- **822A-0200**
  - IntelliPack alarm unit.
  - Two thermocouple/millivolt inputs, two SPDT relays.
  - Software Interface Package.
  - Only one kit is required for all IntelliPack models.
  - See diagram on Page 83 for included parts.
  - 5034-225 USB-to-RS232 adapter. See page 121 for more info.
  - PSSR-VD24 Power supply (24V DC, 2.1A).
  - See Power Supplies on Page 199.
  - TBK-801 Optional terminal block kit, barrier strip style, 2 pcs.
  - (Does not include terminal block for input wiring.)
  - TBK-501 Optional terminal block kit, spring clamp style, 2 pcs.
  - (Does not include terminal block for input wiring.)

** NOTE 1:** To order factory configuration, call Acromag for a configuration form which must accompany your order. Also, append “*C*” to model number (example: 822A-0200-C). 800C-SIP kit is still recommended.
832A Dual Alarm

RTD and Resistance Input

Models
832A-0200: Dual input alarm with two SPDT relays

Input Ranges
RTD: 100 ohm Pt, 120 ohm Ni, 10 ohm Cu
Resistance: 0 to 500 ohms

Alarm Outputs
Dual SPDT electro-mechanical 5A relays

Power Requirement
10 to 36V DC

Approvals
UL, cUL listed.

Description
IntelliPack alarms compare inputs against user-defined limit setpoints to control built-in relays. Each unit offers a selection of input ranges and alarm functions to handle a broad range of applications. As your needs change, you can easily reconfigure the unit for different ranges or functions. Alarm functions available on all models include on/off controller, limit alarm, window alarm, deviation alarm, rate-of-change alarm, and peak/valley detection.

Setup is very easy. IntelliPack alarms are configured through a user-friendly Windows XP/Vista/7 program. Field adjustments and recalibration are quickly performed with front-panel push-buttons and status LEDs. Once configured, IntelliPacks operate independent of any host computer.

Special Features
- Integrated microcontroller performs intelligent signal processing for advanced alarm functions.
- Windows XP/Vista/7 software configuration speeds setup and replacement.
- Push-button reprogrammability facilitates changes in the field without a host PC.
- Multi-purpose inputs accept numerous ranges to reduce spare stock requirements.
- High-resolution Sigma-Delta A/D converter delivers high accuracy with low noise.
- Input excitation supply on each input provides power for a two-wire transmitter.
- Dual alarm operation lets you perform two alarm functions at the same time.
**Performance**

**General Input**
Analog to Digital (A/D) Converter
16-bit Sigma-Delta A/D converter.

Resolution
0.1°C/LSB. ADC typically yields resolutions finer than 0.1°C/LSB.

Ambient Temperature Effect
Better than ±0.005% of input span per °C or ±1µA, whichever is greater.

Noise Rejection
Normal Mode: Better than 40dB @ 60Hz.
Common Mode: Better than 130dB @ 60Hz.

Input Filter
Normal mode filtering, plus digital filtering optimized and fixed per input range within Sigma-Delta ADC.

Input Response Time
Less than 300µS to 98% of final value for a step change in the input. A software programmable delay can be implemented for filtering transients.

Relay Time Delay
Adjustable alarm delay of up to 25 seconds.

Input Overvoltage Protection
Bipolar Transient Voltage Suppressors (TVS).

**Resistance Input**

Resistance Input Range
0 to 500 ohms.

Resistance Accuracy
±0.05 ohms.

**RTD Input**

RTD Input Ranges
100 ohm Platinum, 120 ohm Nickel, or 10 ohm Copper; user-configured.

<table>

Alpha: Pt 1 (α = 1.3850), Pt 2 (α = 1.3911), Ni (α = 1.6720), Cu (α = 1.4272).

2, 3, or 4-wire configurations supported. Module provides sensor excitation, linearization, lead-wire compensation, and sensor break detection.

RTD Excitation Current
1mA DC typical, all types.

RTD Lead-Wire Compensation
25 ohms per lead.

RTD Break Detection
RTD sensor failure can be configured for either upscale or downside.

**Output**

Relays
Two independent SPDT electro-mechanical relays. Contact material Silver-Cadmium Oxide (AgCdO).

 Relay Ratings (CSA ratings)
25V DC @ 5A.
120/240V AC @ 5A.

Expected Mechanical Life
20 million operations.

**Environmental**

Ambient Temperature
Operating: -25 to 70°C (-13 to 158°F).
Storage: -40 to 85°C (-40 to 185°F).

Relative Humidity
5 to 95%.

Power Requirements
10 to 36V DC. 55mA @ 24V. 80mA @ 15V.

Isolation
3-way (input/output/power).
1500V AC for 60 seconds or 250V AC continuous. Inputs share a common.

Radiated Field Immunity (RFI)
EN61000-4-3, EN50082-1.

Electromagnetic Field Immunity (EMI)
No relay trips will occur beyond ±0.25% of input span from setpoint under the influence of electromagnetic fields from switching solenoids, commutator motors, and drill motors.

Electrical Fast Transient (EFT)
EN61000-4-4, EN50082-1.

Surge Withstanding Capability (SWC)
EN61000-4-5, EN50082-1.

Electrostatic Discharge (ESD)
EN61000-4-2, EN50082-1.

Radiated Emissions
EN61000-4-2, EN50082-1.

**Software Configuration**

Units are fully programmable via the Windows XP/Vista/7 IntelliPack Configuration Program. Configuration downloads from PC through EIA232 serial port using Acromag 800C-SIP kit.

1.05W x 4.68H x 4.35D inches.
26.7W x 118.9H x 110.5D millimeters.

Shipping Weight
1 pound (0.45 Kg) packed.

**Ordering Information**

IMPORTANT: All IntelliPacks require initial software configuration (order 800C-SIP). See Note 1 below.

832A-0200
IntelliPack alarm unit.
Two RTD/resistance inputs, two SPDT relays.

800C-SIP
Software Interface Package.
Only one kit is required for all IntelliPack models. See diagram on Page 83 for included parts.

5034-225
USB-to-RS232 adapter. See page 121 for more info.

PSR-VD24
Power supply (24V DC, 2.1A). See Power Supplies on Page 199.

TBK-B02
Optional terminal block kit, barrier strip style, 4 pcs.

TBK-S02
Optional terminal block kit, spring clamp style, 4 pcs.

NOTE 1: To order factory configuration, call Acromag for a configuration form which must accompany your order. Also, append "-C" to model number (example: 832A-0200-C). 800C-SIP kit is still recommended.

## Accessories

### Terminal Blocks

**Barrier Strip Terminal Blocks**

- **Ordering Information**
  See individual I/O modules for compatibility.

**Spring Clamp Terminal Blocks**

- **Ordering Information**

### Mounting Hardware

**DIN-Rail Mounting**

For your convenience, Acromag offers several mounting accessories to simplify your system installation. Our 19" rack-mount kit provides a clean solution for mounting your I/O modules and a power supply. Or you can buy precut DIN rail strips for mounting on any flat surface.

**Ordering Information**

### Power Supplies

**50W Supply**

Input Power Requirement
85 to 264V AC or 105 to 370V DC

Output
24V DC, 2.1A (50W)

**Ordering Information**

See Power Supplies on Page 199 for other models and more information.
