XMC730E: Front I/O, extended temperature

XMC730CC: Rear I/O, conduction-cooled

Description

[XMC730](#) mezzanine modules provide a variety of I/O functions on a single plug-in card. These new high-density modules perform both high-speed and high resolution A/D and D/A conversion and also handle digital I/O and counter/timer functions.

Now you can conserve your precious XMC slots and still get all the I/O functionality you need. The XMC730 is designed for extreme versatility with many deluxe features to meet most applications. However, the XMC730 is still very budget-friendly. A conduction-cooled version is also available.
