California Proposition 65

Acromag "California Proposition 65" position statement

The following is Acromag's position statement on California's Safe Drinking Water & Toxic Enforcement Act of 1986. The Act, commonly known as Proposition 65 (Prop 65), establishes a list of chemicals which the State of California risk assessment process has determined to present a risk of cancer, birth defects or other reproductive harm.

As part of "regular" electronic assembly, Acromag products may contain trace amounts of lead from solder and components. Most assemblies are in enclosures and protect the user from contact. Since Acromag is uncertain on how much exposure levels of lead and lead components or any other chemicals there is without testing, Acromag will state the following.

Acromag does not intentionally add any of the remaining chemicals per the February 25, 2022 List of California Proposition 65 chemicals.

⚠ WARNING: Acromag products can expose you to chemicals including lead and lead components, which is known to the State of California to cause cancer and birth defects or other reproductive harm.

Acromag believes our products are not harmful to humans when used per its application. We provide the warning as result of this California Law.

For more information, go to www.P65Warnings.ca.gov.

Human safety is Acromag's number one concern. We welcome all environmental concerns and will work every day to make our products the safest they can be. We will continue to monitor the California Proposition 65 for any new chemicals or information to keep our customers informed.

Revision History

The following table shows the revision history for this document:

Release Date	Version	EGR/DOC	Description of Revision
17 SEP 2018	A	CAP	Initial Acromag release.
22 MAR 2022	B	CAP	Update statement with February 25, 2022 List of California Proposition 65 chemicals. Assigned document # and revision history.
